Response to a Notice of a Non-Compliant Amendment

Application No. 10/782, 454

This communication is a response to a Notice of a Non-Compliant Amendment. The Notice has a mailing date of 08/10/2005. The mailing date of the first Office Action was 06/10/2005. Therefore, the time of three months within which to respond continues to run until 09/10/2005.

Remarks

Pursuant to a very informative and constructive telephone conversation on 08/16/2005 with the examiner John A. Jefferey, the following changes, additions or amendments are being made based on the Detailed Action of 06/06/2005.

The examiner suggests a new title: The suggested title can only be partially accepted because the acceptance of "Whose Light is Transferred to Another Light Source" would be incorrect. The second heat converting device is not a "source" but a receiving device.

The abstract has been amended as suggested by the examiner except "glass" on line 10 cannot be changed to -plastic-. Plastic, in this environment, cannot be used because of the tremendous heat that is being generated by the light bulb (up to 800° F). Plastic material cannot withstand this heat.

Proper corrections have been made on page 1.

On page 2, line 5, the paragraph has been indented and "catch" has been corrected. Line 14 has been corrected. Line 16 has not been corrected as will be discussed below. Line 16 has been corrected as to the examiner's suggestion, however, "plastic" has also been changed to glass for reasons set forth when discussing the Abstract. Line 17, the corrections have been made. However, "12" has not been inserted as will be discussed below.

The examiner is respectfully requested to leave the "list of parts" intact and not to request a deletion. The applicant is aware of numerous patents having parts
